

RESIDENCE
Traveller
MEDIKIT 2026

Residence Traveller is not just another travel magazine—it is a celebration of the world's most remarkable stays. We seek out hotels where service sets a new standard, villas that open onto panoramic horizons, and bars where a martini is mixed to perfection. Every address we feature is chosen for its beauty, its atmosphere, and its ability to transform travel into something unforgettable.

Interiors take center stage: striking design, timeless style, and spaces that spark the imagination. Each story is an invitation—to linger, to dream, and to collect experiences that resonate long after the journey ends. From dazzling city hotspots to secluded retreats, we curate the world's finest escapes.

With 35 years of heritage in design and interiors, Residence now brings its discerning eye to travel. Traveller combines visual inspiration with trusted guidance, becoming your companion in the art of refined discovery. Together, we explore places where

every detail tells a story—and every stay becomes a memory.

Traveller will be published four times in 2026: in April, June, October and December. Traveller will appear as a package together with Residence, but also as a standalone and directly in the letterbox for all Residence subscribers.

Every edition of Residence Traveller will pay extra attention to a specific destination and is something to keep and will remain a source of inspiration.

In addition, there is a selection of the most beautiful houses for rent. Whoever wants to stay in the most beautiful places in the most wonderful locations will find a great selection in Traveller.

Residence Traveller has special branded content opportunities for the travel industry. For more information, please contact our sales department.

mediakit.

A vibrant tropical beach scene under a clear blue sky. In the foreground, a sandy beach curves along the edge of turquoise water. To the left, a lush green lawn is dotted with palm trees and other tropical foliage. A building with a thatched roof is partially visible behind the trees. On the beach, there are some lounge chairs and a small, modern structure. The water transitions from a shallow, clear turquoise to a deeper blue as it stretches towards the horizon.
